

**Friday 8.5.20**

**Year 4**

## **English**

Today is the anniversary of a very important day in world history. The day is known as VE day and it commemorates the day that peace was declared in Europe at the end of the Second World War. Your English learning is linked to VE day. Download the file from the school website and read the information. Then answer the questions. You can print the sheet and write on it or you can write the answers in your home learning book.

## **Maths**

Today you have a challenge that will use a range of your maths skills. The challenge is on the [White Rose website](#). The questions that will be best for year 4 are also noted on the website. However, you can have a go at some of the other questions as well to challenge yourself.

## **Science**

Today we are going to investigate some food in our homes to find out what the nutritional value is. Pick 5 (or more) different foods that you have in your house. Predict which one you think will have the highest amount of each of the nutrients. Print out and fill in the table from the school website (or make a table of your own). Then look at the nutritional information on the packet and fill in the rest of the table. Were you surprised by any of the foods you picked?
