

English

Following on from last week’s work on suffixes, we are going to learn about prefixes.

A prefix is a string of letters that are added to the beginning of a root word, changing its meaning. Each prefix has a meaning (for example, un- means not, sub- means under mis- means wrong or badly).

Look at the table of prefixes, the meaning of each prefix and an example.

Finish the table by writing your own sentence including the example prefix.

Challenge

Think of some more words with prefixes. (There are some examples on the website)

Challenge yourself to write a sentence for each word.

Prefix	Meaning	Example	In a sentence
re-	to do again	<u>redo</u>	
un-	not	<u>unwell</u>	
dis-	opposite of	<u>disagree</u>	
mis-	wrongly	<u>misheard</u>	
pre-	before	<u>preheat</u>	

Monday 18.5.20

Year 4

Maths

We are continuing to use the White Rose videos and resources to support your learning this week. However, there is a slight change in the way this will work. The video will still be available on the [White Rose website](#) but the worksheet will have to be downloaded from the school website. There are also additional resources available from the [BBC Bitesize website](#) that will match the learning.

Remember to watch the video first then have a go at the activity.

Today's lesson is

Summer Term - Week 5 Lesson 1 Recognise tenths and hundredths

Geography

Present your research from last week. You could use PowerPoint or Word. Or you could create fact cards or write a non-chronological report. You might even choose to do a poster or make your own video. It is up to you how you present your work but don't forget to include some pictures or drawings. Once you have created your final piece you could send us some pictures, or if you create something digital, why not send it to us? We would love to see what you have come up with.
