

Thursday 11.06.20

Year 4

English

Today's English is from the BBC Bitesize page again. The [link is here](#) and also on the school website. Today is all about using a thesaurus. Work through the page starting with the video(s) then moving to the activities. As before, you can print off any sheets and work on them or you can write straight into your book.

Maths

We are continuing to use the White Rose videos and resources to support your learning this week. Remember, there is a slight change to how this works. The video is available on the [White Rose website](#) but the worksheet will have to be downloaded from the school website. There are also additional resources available from the [BBC Bitesize website](#) that will match the learning.

Make sure to watch the video first then have a go at activity.

Today's lesson is

Summer Term - Week 7 - Lesson 4 – dividing 1 and 2 digits by a hundred

Science

In this unit, we are going to be looking at animals, including humans, and we are going to think about what they eat and why they eat. We will start with humans then we will look at other animals.

Before looking at the power point on the website, think about these questions.

What food have you eaten today? What foods do you enjoy? Why do we eat food?

Work through the power point on the school website, answering the questions. When you have finished, fill in the 'Eat Well Guide'. Make sure to include the foods and the number of portions a day. You should also add extra details about high fat and high sugar foods and drinking 6-8 cups of water a day. Refer to the power point to support you.
